

To introduce myself for those I have not met, and to re-introduce myself for those I have, I am a board- certified neurologist with a fellowship in movement disorders. I am originally from central Illinois, and I attended the University of Illinois in Champaign-Urbana with a major in Chemistry. After a misguided year as a graduate student in Physical Chemistry at the Massachusetts Institute of Technology I redirected and attended medical school at the Temple University School of Medicine in Philadelphia. I completed my internship in Internal Medicine and residency in Neurology at the University of Wisconsin in Madison, followed by two years of fellowship in Movement Disorders at the University of Michigan in Ann Arbor.

Foremost I am a clinician. I enjoy patient care, but also throughout my career I have been involved in clinical trials, research and education. I have authored and co-authored several publications, some more interesting than others, and a couple of book chapters, all mostly on topics of Movement Disorders.

My interests outside of my work are centered mostly on my family. My wife and I have two grown children, both living abroad. Our daughter is in Iceland (my wife's home country, it is as beautiful as the pictures indicate) and our son is in Copenhagen. I like music of most types. I enjoy strumming and plucking my guitar, although I do not seem to improve, and I delude myself that one day I will learn to play the piano.

Neal Hermanowicz, MD, FAAN
